

FOR ALL TEACHERS & SENCOs

Assessment & Recording Software for Special Educational Needs

We have a fantastic range of software available that can help you streamline identification of children's needs and the preparation of Individual Education Plans, especially for dyslexia and other learning difficulties.

IEP WRITER 3

IEP Writer 3 enables you to create and update individual education plans in minutes so you can

provide learning support that is tailored to the individual needs of each pupil. The software is intuitive and easy to use, and helps you create effective plans including realistic learning targets that challenge gifted pupils and encourage those with different abilities.

- Complete, detailed IEPs created in minutes.
- Written by teachers for teachers.
- Easy to use - get started straight away.
- Saves time - hours of typing replaced by a few clicks of the mouse.
- Target setting for all pupils - not just SEN.

LUCID EXACT

Assessment of skills and underlying literacy to evaluate the need for Access Arrangements in examinations. Provides valuable evidence for Examination Boards. Lucid Exact provides precise standardised assessment of word recognition/reading accuracy, reading comprehension, reading speed, spelling, writing to dictation, and typing to dictation.

It is suitable for students from age 11-24 years in Secondary, 6th Form, FE and HE.

LUCID RAPID

Lucid Rapid Dyslexia Screening is the solution for quick and easy screening for dyslexia in the 4-15

age range. The computer gives each child three enjoyable and non-threatening tests that are sensitive cognitive indicators of dyslexia. Each Screening component has been individually standardised, validated and calibrated to maximise accuracy in detection of dyslexia and prevent dyslexic children 'slipping through the net'. There are very low rates of false positives ('false

alarms') and false negatives ('misses').

The tests in Lucid Rapid include:

- Phonological Processing (4-15 years)
- Working Memory (4-15 Years)
- Phonic Decoding Skills (8-15 years)
- Visual-verbal integration memory (4-7 years)

LUCID LASS

Presented in the form of games, this series of assessments focused on dyslexia measures literacy, reasoning, memory and phonics.

Available in Junior, Secondary, Single, Multi-user and Network versions.

LASS is very easy to administer. Students require only minimum supervision while doing tests.

LASS enables teachers to identify students with dyslexia (specific learning difficulty) but it has many other important functions as well, including:

- Identifying underlying problems in memory or phonological skills
- Monitoring development in reading and spelling on a regular basis
- Evaluating progress in

memory, phonological and phonic skills.
